

Flowering plant list for Paxton Pits

The recording work was undertaken in 2006, and it is hoped that this will continue on an ongoing basis. If no record has been entered against a species then the plant was not recorded in 2006 but was seen in previous years.

If you would like to submit any flowering plant records please email the information including the plant's location to paxtonflowers@fsmail.net. Alternatively, enter them in the daily record book in the Visitors' Centre, with a location (please ask the voluntary warden for a recording map, and use the grid square). You may also find it helpful to use the Nature Reserve Trail guide.

So, good hunting and we look forward to receiving your records.
